Web Development : HTML , CSS , React ,
Database : SQL
Tools : Git, GitHub , VS Code
Core Competecies : Data Structure , Operating System

Projects

AI Powered Smart Traffic Management System For Emergency Vehicles	Jan 2026
• Built an intelligent traffic control system using YOLOv8 computer vision that detects emergency vehicles (ambulances, police cars) with 92% accuracy from CCTV footage • Implemented multi-junction signal synchronization with Flask backend and React dashboard, reducing emergency response time by 40% through dynamic green corridor creation. • Developed a three-tier user interface (Traffic Control, Ambulance Dashboard, Admin Panel)	
YourHearingEar – Personal Counseling Website	Sep 2025
• Designed and developed a conversational support system focused on providing empathetic guidance and structured responses for personal and emotional well-being. • Implemented user-centric interaction logic to ensure meaningful, supportive, and responsible communication, emphasizing clarity, trust, and ethical handling of sensitive conversations.	
GrowPure – Organic E- Commerce Platform	Mar 2022
• Developed a full-stack organic eCommerce web application using Django, HTML, CSS, JavaScript, and Bootstrap, featuring cart management, coupons, discounts, order tracking, and user/admin dashboards. • Designed a responsive and user-friendly interface with secure backend integration, focusing on scalability, clean architecture, and real-world eCommerce workflows.	

Experience

Passion Software Solutions, Jalgaon

Full Stack Development Intern | May 2024 – July 2024

- Developed web applications using Django framework, building REST APIs, database models, and responsive frontend interfaces
